## CATARRH

LOCAL DISEASE  
 Catarrh is the most common and most distressing of all diseases. It is caused by a germ which enters the system through the nose, and is often the result of a cold. It is characterized by a constant discharge from the nose, which is often bloody. It is often accompanied by a headache, and a general feeling of weakness. It is a disease which is often neglected, and which, if not treated, will lead to more serious complications. It is a disease which is often cured by the use of medicine, but it is often more effectively cured by the use of the Catarrh Remedy. This remedy is a powerful agent, and it is often the only remedy which will cure the disease. It is a remedy which is often used by the most successful physicians, and it is often the only remedy which will cure the disease. It is a remedy which is often used by the most successful physicians, and it is often the only remedy which will cure the disease.

## Little Sister of the Nation.

One of the most interesting personalities which the national congress of mothers brought to New York recently was that of Miss Janet Richards of Washington. Little Sister of the Nation would far more accurately describe Miss Richards' peculiar form of activity. Her special province is what she calls "Hilltop Talks of the World."

It is not in the sense of mothering her listeners that she talks; it is merely as an enthusiastic leader, in a mental journey over our civilization, noting salient facts. "All questions of international conflict are primarily questions of geography," is her maxim. Congressional affairs come under her broad review, and senators' wives are of those who peep at congress through the medium of her bright discourses.

When Li Hung Chang consented to receive Miss Richards and, after his habit, exhibited a determination to interview her rather than to interview the clever little woman aroused his curiosity by offering to tell him why so many American women remained unmarried.

"Why?" demanded his Chinese highness.

"For one reason," replied Miss Richards, "they have so many other resources. But the main cause is that they are rarely asked to marry by men who are their equals in intelligence."

And the east powdered afresh on the many-sided American woman.—New York World.

## Dress Interlinings.

The general tendency is to discard all stiff interlinings on the newest gowns. This does very well where one can afford a crisp tulle silk lining in each new dress, but when this is not possible not a few women are protesting against the use of nothing but a soft finished peraline lining, with no sort of interlining added even as a facing. They argue, and justly so, that a skirt so finished has a lank, unstylish appearance (especially if of soft wool fabric) after the so recent vogue of interlined, undulating skirts with a crisp flare and a certain cachet wholly absent in a soft lined model whose folds or breadths fall limp around the feet like those of a Quakeress. There are a number of fashionable modistes who have come to the rescue in this matter. They make an underskirt nearly as long as the dress skirt, employing crinoline, haircloth, moire, etc., as may be preferred, for the foundation. This skirt can be covered with silk of some dark shade and if well cared for will last a long time. This skirt is gored on the front and sides, with a deep flounce at the bottom, and the three or four shirred or box plaited ruffles at the back are run through the inch wide hem at their edges with a single band of feather bone. Worn under the dress, all the slightly flaring effect of an interlined skirt is given.—New York Post.

If we were to choose the most appropriate symbol of the feeling, the enthusiasm, the excitement, the joy, the here today and the here tomorrow, perhaps it would be the face of a boy.

Dr. J. C. Sanders, Catarrh Remedy.

Consumption kills more people than rifle balls. It is more deadly than any of the much dreaded epidemics. Fully one-sixth of all the deaths in America are caused by consumption. It is a stealthy, gradual, disease. It penetrates the whole body. It is in every drop of blood. It seems to work only at the lungs, but the terrible drain and waste go on all over the body. The only way to get rid of consumption is to work on the blood, make it pure, rich and wholesome, build up the wasting tissues, put the body into condition for a fight with the dread disease. The cure of consumption is a fight—a fight between sound tissues and the encroaching germs of disease.

Dr. Pierce's Golden Medical Discovery fights on the right side. It drives the germs back, forces them out of the body. It will cure 95 per cent. of all cases of consumption if it is taken during the early stages of the disease. Its first action is to put the stomach, bowels, liver and kidneys into good working order. That makes digestion good and assimilation quick and thorough. It makes sound healthy flesh. That is half the battle.

When Dr. Pierce, of Buffalo, N. Y., published the first edition of his work, The People's Common Sense Medical Adviser, he announced that after 60,000 copies had been sold at the regular price, \$2.00 per copy, the profit on which would repay him for the great labor expended in producing it, he would distribute the next half million free. As this number of copies has already been sold, he is now distributing absolutely free, 50,000 copies of this great work, but twenty-five cents in recent stamps to pay for postage and packing only being required. It is a veritable medical library, complete in one volume. It contains over 200 pages and more than 500 illustrations. The first edition is precisely the same as those sold at \$2.00 except only that the books are bound in strong paper covers instead of cloth. Send stamps now before all are given away. They are going off rapidly.

Telephone in office, a key to which may be  
obtained at John Sunderland's store or at  
Sunderland's drug store.The Fourth...  
The supreme court of Nevada has de-  
cided that the woman suffrage amend-  
ment is valid. Any other decision  
would have been clearly unjust, since  
the vote in favor of the woman was  
nearly two to one. The political equal-  
ity clause can now take out the stars  
which they had prepared to sew upon  
the suffrage flag for California and sew  
them on for Idaho. We have our fourth  
star, after all.—Boston Woman's Jour-  
nal.The disposition to utilize all unusual  
and foreign products is illustrated in  
the chairs seen in some shops. They are  
made of the plaited Malay mats, mount-  
ed, to form a sweeping back, upon an  
American frame. They suitably con-  
tribute to the odd and artistic furniture  
which abounds in these days.NERVOUS Troubles are due to  
impoverished blood. Hood's Sas-  
aparilla is the One True Blood

Commercial Row.

## The Breakfast Jacket.

The breakfast jacket this season has  
taken the place of the breakfast gown.  
It is made of a variety of materials and  
is worn generally with a skirt formation.  
The most expensive are made of flun-  
nelette, and the most costly of silk.  
Some of the elaborate ones, with a skirt  
to match, are almost as expensive as a  
party gown. The silk skirt is trimmed  
with lace ruffles and the jacket made  
with a lace bolero. But for everyday  
wear the breakfast jacket of flannelette  
is the most serviceable. One dainty  
French model, recently seen was of pale  
violet flannelette, trimmed with baby  
ribbon in deep violet. The jacket was  
made with a full loose front and a bo-  
lero of course cream lace. The yoke was  
trimmed with lines of the baby ribbon,  
which in the center were fastened in a  
knot with many loops. The collar was  
a high full of violet silk, edged with  
three rows of the ribbon velvet. The  
sleeve was made with a short puff at  
the shoulder, which was finished with  
five rows of the ribbon wound about the  
arm and then tied in a bow. The deep  
cut of the sleeve was made of two lace  
frills and headed by rows of baby ribbon.  
The skirt to be worn with this jacket  
was made of flannelette of the same  
color. A deep bounce of violet silk fin-  
ished it at the bottom. The blouse was  
almost entirely covered by rows of the  
baby velvet ribbon in the dark shade of  
violet. Cashmere frockfast jackets trim-  
med with lace are also very pretty.  
They may be worn with a skirt to match,  
or one of silk. One seen recently was of  
bright scarlet cashmere trimmed with  
black lace insertions and narrow black  
velvet ribbons.—Chicago Times-Herald.

## International Woman's Congress.

The international woman's congress,  
which met last September in Berlin has  
been a wonderful success. It has been a  
genuine revelation in the German com-  
munity. The tone of the press has un-  
dergone a complete change. Instead of  
disparaging or serious disapproval the  
newspapers are now animated by a  
friendly spirit. The women and their  
doings are treated with respectful atten-  
tion. The calm and dignified tone of the  
discussions has won universal approval.  
The New York Nation says:  
Even the exchange of views between the  
Socialdemocrats and the more  
conservative majority of the participants  
in the congress did not lead to intem-  
perance of language or exhibitions of  
violent antagonism, a circumstance  
with which foreign delegates have been  
favorably impressed. English and  
French delegates have expressed their  
surprise at the remarkable self control  
and matter of fact ways of the German  
women. The latter, in their turn, are  
deriving from occurrences at the con-  
gress encouragement for the future rec-  
onciliation of the classes through the  
mediation of women. One of their spe-  
cial objects of agitation just now is the  
revision by the new reichstag two years  
hence of certain sections of the new  
civil code of the empire, which will not  
take effect till the year 1900.

## Working Girls' Clubs.

There is a federation comprising 22  
working girls' clubs of Boston and vi-  
cinity. The work of one of these clubs,  
the Shawmut, was described by Miss  
Edith M. Howe at a recent meeting of  
the good citizenship class.For the past year the club has inter-  
ested itself especially in the outside lives  
of the working women.An investigation of the moral condi-  
tions in which they are placed has been  
carried on. Factory girls have been  
made ready to report, and their reports  
have in general been much more favor-  
able than those of girls employed in  
stores, but even here girls of innate  
purity of character and motive are safe,  
with a few exceptions. Only one or two  
employers were found in Boston who  
subjected girls to extraordinary tempta-  
tions, and against these men working  
girls were warned.Some of the girls rather resented this  
sort of investigation and asked why the  
club workers did not do something prac-  
tical, such as taking measures for the  
bettering of wages and the obtaining of  
shorter hours. In consequence the sub-  
ject of early closing was agitated, and  
an organization was formed among the  
women, similar to the beneficial associ-  
ation of young men clerks, with a mem-  
bership of over 100.

## Women and Money Matters.

It has often been noted that women  
are more honorable in money matters  
than men, and that it is far less rare to  
have a small loan paid back by a woman  
than by a man. This fact, again, ap-  
pears to us to be fully explained by the  
trustee theory of woman's attitude to-  
ward money. Women are not honest  
in other things than men, but the notion  
of money being a trust overrides and  
dominates other considerations. The  
man who borrows is very apt to forget  
all about the matter. The woman who  
borrows feels that a double trust runs  
with the money, and she cannot rest  
till she has repaid it. No doubt there  
are here also many exceptions, because  
there are many bad women, but at least  
it is safe to say that women are far less  
careless about money matters than men,  
and therefore less likely to commit the  
small acts of pecuniary dishonestness  
which come from negligence. Take it as  
a whole, women are more careful about  
money matters than men and attach  
more importance to money; hence it  
happens that they never make great for-  
tunes, seldom go bankrupt, and gener-  
ally are rather more scrupulous than men  
in small pecuniary transactions.—Lon-Lovely medallions of Coalport and  
Doulton china, exquisitely hand paint-  
ed and about the size of a silver dollar,  
are sold singly for use in confining the  
lace of a corsage or throat band.The Grangers of New York have gen-  
erally favored woman suffrage and are  
probably as yet the largest body of sup-  
porters of this reform in that state.—  
American Cultivator.Much of the beautiful decorative work  
in the hall of the new horticultural  
building, in Philadelphia, was done by  
the women students of the School of In-  
dustrial Art.The Women's Educational and Indus-  
trial union of Buffalo owns one of the  
largest and finest buildings in the city  
and has a membership of 1,038.A Woman's Literary club in Pat-  
erson, N. J., has decided to organize itself  
into a political organization.

## OXYGEN AS A HEALER.

A Record of Several Valuable English Ex-  
periments.During the Zulu war Dr. George  
Stoker, who served during the campaign  
as an army surgeon, had an opportunity  
of observing the method in which the  
natives treated their wounded comrades.  
He noticed that they carried them to the  
highest point attainable, and there ex-  
posed the wounds to the purest air and  
the action of pure water. This simple  
remedy was swift and sure, the worst  
cases yielding rapidly under its influ-  
ence, doubtless, the healthy state of the  
blood and the abstemious lives led by  
the natives having a good deal to do  
with the matter. Dr. Stoker was led to  
believe that the oxygen cure might be  
applied to ulcers, burns and wounds of  
a similar nature, and on his return to  
this country he made several experi-  
ments on such cases, and the more he  
saw of it the firmer was his belief in his  
discovery. Bacteria consist of two kinds  
—the harmful micro-organisms, and  
those necessary to the system in order  
that the mechanism of the body may be  
carried on satisfactorily. Before the dis-  
covery of antiseptic surgery, the risk  
which was run wherever a raw surface  
was exposed to the air was enormous,  
but with the introduction of antiseptics  
into the treatment the danger was re-  
duced to a minimum. Iodoform has al-  
ways been the special medium for use  
in the case of ulcers, and it is not a  
pleasant one, but it tended to hold the  
bacteria at bay. Now, however, it has  
been noticed that in cases where oxygen  
has been applied and where the wound  
is healing the progress was marked by  
the presence of common organisms and  
that if a relapse occurred the bacteria  
disappeared, so that one is led to the  
conclusion that a certain number of  
these living organisms are necessary in  
the formation of new and healthy flesh.It was decided to enter upon a wider  
field of operations and test this experi-  
ment further—for it must be borne in  
mind that as yet it is only an experi-  
ment—and accordingly a committee of  
ladies and gentlemen, under the presi-  
dency of Baroness Burdett-Coutts, un-  
dertook to establish a hospital at 55 St.  
George's square, S. W. The hospital is  
small, but if funds were forthcoming a  
larger house could be secured. The oxy-  
gen used is said to be first generated in  
an iron funnel, and thence it is pumped  
into india rubber bags, according to the  
strength required. The part affected is  
then inclosed in a wooden box with a  
glass lid and caased round with oilskin.  
A tube communicates with the box and  
the bag, and in this way the oxygen is  
introduced into the box. Other appar-  
atuses are contrived for the back, head  
and other parts of the body. The first  
effect is the cessation of pain, and the  
healing properties are quickly discerned.  
One case of an ulcer of 40 years' stand-  
ing had yielded to the treatment in  
three weeks, another of 18 years in an  
equally short time, and many others  
had a similar tale to tell. Not one of  
the least of the virtues of the oxygen is  
its deodorizing power. It has also been  
tried on cases of baldness, with the re-  
sult that the hair grew rapidly and in a  
short time was in a normal condition.  
To what length the curative properties  
of oxygen may be carried remains to be  
proved, but it has at least one advan-  
tage, that of extreme economy, for, be-  
yond the cost of the oxygen, which, it is  
said, comes to about 2½ pence for 24  
hours, there is no expense for dressings  
or medicines.—British Sanitary Record.

## Her Idea of Humor.

How delightful they are, those people  
who don't understand a joke, to whom  
the point in an anecdote is a delusion  
and a snare!Miss P. is a clever woman and an ex-  
cellent teacher. But the solid sciences  
are more in her particular line than  
anything which savors of the article  
called fancy.Some years ago one of the children's  
magazines printed an amusing little  
jingle about a young lady at an achery  
party who became so alarmed at the  
promissuous flight of the arrows that,  
in order to be perfectly safe from harm,  
she seated herself directly in front of  
the target.Some days ago Miss P. was reading  
aloud from a bound volume of the mag-  
azine to some of her younger pupils.  
She read this jingle and coughed over it  
till tears came."Well, well, well!" said dear Miss  
P. "How true to life that is! I know  
hundreds of young people who are just  
foolish enough to bring their stools and  
sit down in that very spot."—Philadel-  
phia Press.

## He Has a Reason.

"He really doesn't want to be fa-  
mous?"

"That's what he says."

"Do you believe it?"

"Well, yes. I know him pretty well,  
and I know it's a matter of conscience  
with him."

"I don't believe I quite follow you."

"Why, he wouldn't like to feel that  
he was even indirectly responsible for  
all the lies that are sure to be told about  
a famous man after his death."—Chi-  
cago Post.

## This Is Your Opportunity.

On receipt of ten cents, cash or stamps,  
a generous sample will be mailed of the  
most popular Catarrh and Hay Fever Cure  
(Ely's Cream Balm) sufficient to demon-  
strate the great merits of the remedy.

ELY BROTHERS,

56 Warren St., New York City.

Rev. John Reid, Jr., of Grant Falls, Mont.,  
recommended Ely's Cream Balm to me. I  
can emphasize his statement. "It is a posi-  
tive cure for catarrh if used as directed."  
Rev. Francis W. Poole, Pastor Central Pres-  
byterian Church, Helena, Mont.Ely's Cream Balm is the acknowledged  
cure for catarrh and contains no mercury  
nor any injurious drug. Price, 50 cents.MINING AND SCIENTIFIC PRESS,
